

Merging multi-part files

Non-Graphical (command prompt)	2
Graphical	4

Non-Graphical (command prompt)

Go into command prompt, to a path that contains your splitted archives:

1. Command prompt is often situated in Start menu /accessories (“Start->Programs->Accessories->Command prompt”), but to avoid differences between windows version differences, it’s maybe safer to run command prompt by pressing “Windows Key + R”, then typing “cmd”.

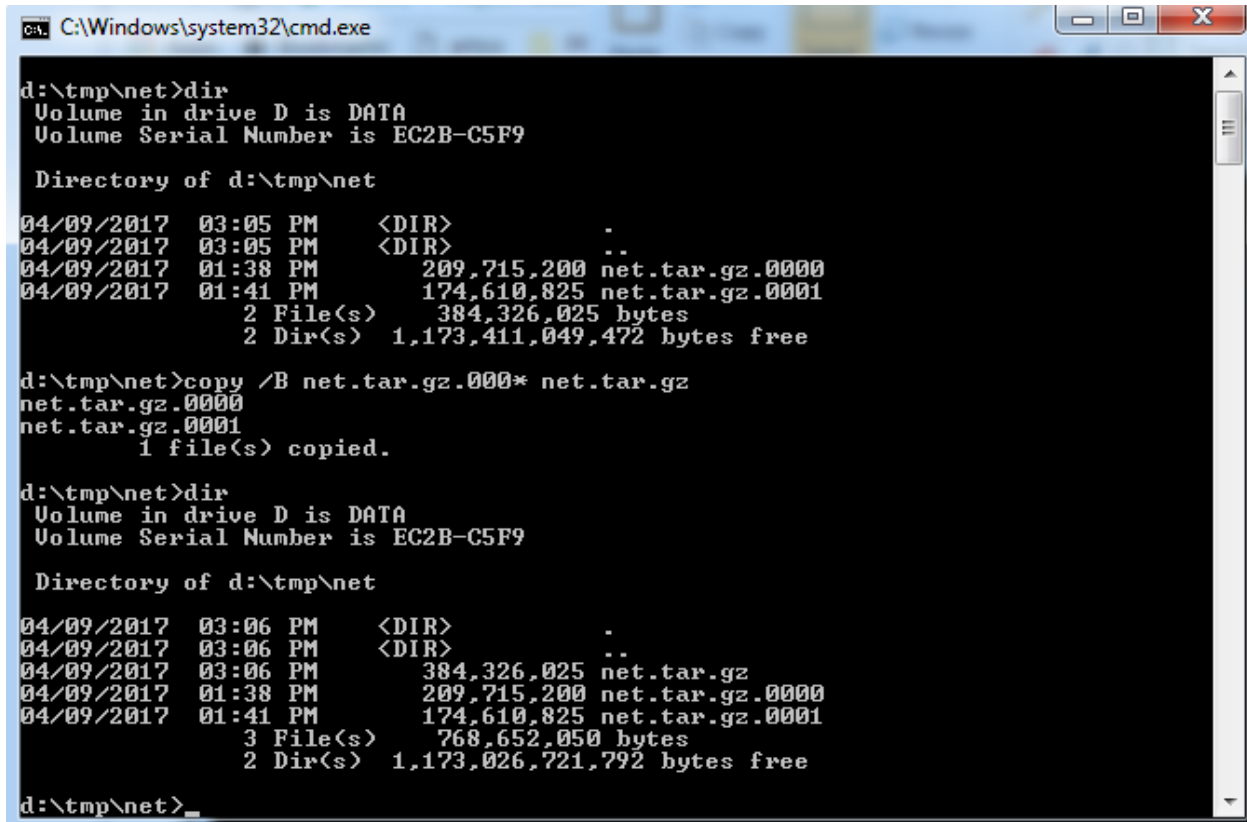

Basic commands:

To change partition, simply type: “C:”, “D:”, etc.

To change path/directory, type: "cd <PATH>", for e.g. "cd c:\tmp"

List directory structure: "dir"

To merge files: "copy /B <FILE_PREFIX>* <OUTPUT_FILE>"

```
C:\Windows\system32\cmd.exe
d:\tmp\net>dir
Volume in drive D is DATA
Volume Serial Number is EC2B-C5F9

Directory of d:\tmp\net

04/09/2017  03:05 PM    <DIR>          .
04/09/2017  03:05 PM    <DIR>          ..
04/09/2017  01:38 PM             209,715,200 net.tar.gz.0000
04/09/2017  01:41 PM             174,610,825 net.tar.gz.0001
                2 File(s)      384,326,025 bytes
                2 Dir(s)  1,173,411,049,472 bytes free

d:\tmp\net>copy /B net.tar.gz.000* net.tar.gz
net.tar.gz.0000
net.tar.gz.0001
                1 file(s) copied.

d:\tmp\net>dir
Volume in drive D is DATA
Volume Serial Number is EC2B-C5F9

Directory of d:\tmp\net

04/09/2017  03:06 PM    <DIR>          .
04/09/2017  03:06 PM    <DIR>          ..
04/09/2017  03:06 PM             384,326,025 net.tar.gz
04/09/2017  01:38 PM             209,715,200 net.tar.gz.0000
04/09/2017  01:41 PM             174,610,825 net.tar.gz.0001
                3 File(s)      768,652,050 bytes
                2 Dir(s)  1,173,026,721,792 bytes free

d:\tmp\net>_
```

Use any tool to open archive (winZip, WinRar, etc.)

File Joiner

File Joiner allows you to easily join .001/002/003 files. File Joiner is a free application, available in both 64bit and 32bit versions.

Features

- Faster joining with option to append all files to first file
- Loading files from folder and recursive loading from sub-folders
- Auto sorting (numerical [.001, .002] or full path sorting)
- Auto loading consecutive parts when you open or drag&drop file with extension .001
- Auto output file path generator (file "c:\test.avi.001" will generate output file path "c:\test.avi")
- Tests for missing parts and parts with wrong file size (e. g. bad download)
- MDS and CRC32 hash calculation for output file
- Option to associate extension .001 in windows explorer, allows you to load files by double clicking the .001 file (not portable)
